Schwartz-Mei Group

Global Logistic Properties

Global Logistic Properties Limited ("GLP") is the leading provider of modern logistics facilities in China, Japan, Brazil and the United States . Their property portfolio of over 530 million square feet is strategically located across 118 cities, forming an efficient logistics network serving more than 4,000 customers.

Network Solutions Int'l has supported all aspects of the late Chairman of the Executive Committee, Jeffery Schwartz's local office since 2011, providing the ultimate in "white glove" service. We initially designed the local offices entire computing platform as a part of a successful relocation. This infrastructure includes the design build of their computing platform which included desktop computing, E-mail, Voice and Video Conferencing Networks, and Security for the Santa Monica, CA location. For many years, we have provided 24/7 support, answering every call, fixing every issue, and completing every project as quickly as possible.

KEY PROJECTS COMPLETED

Design Build of the initial office and multiple expansions of the local offices, Computing, and Voice/Video Conferencing setup.
