M. David Paul & Associates

Worthe Real Estate

Rising costs and increasing demands from sophisticated tenants requires that MDP&A & Worthe Real Estate remain on the cutting edge of technology. They are a nationwide real estate developer and owner of premier landmark buildings throughout the LA area. Their buildings are home to such names as NBC, Yahoo, Bravo, Sony Pictures, Warner Bros, and Clear Channel. To maintain the image of these properties and to serve their exclusive clientele, while keeping a lid on costs, their properties need to be “smarter”.

Enter Network Solutions Int’l. For many of their properties, Worthe has turned to NSI to assist them with the IT needed to create smarter buildings. As part of this process, NSI has helped to upgrade the Wide Area Network for Worthe properties throughout LA county. We’ve also provided 24/7 help desk support, on-site repair, and maintenance at all of their buildings, including their headquarters in Santa Monica.

Key Projects Completed:

MTV Building – Santa Monica

Network Redesign and Build for the infrastructure network supporting HVAC and building management.

Disney Building – Burbank

Network Design Build for the infrastructure network supporting HVAC and Smart Lighting by Encelium a Sylvania Division.
